

## Step 1: Connect to the ABB plc page.

Connect to the url: <http://new.abb.com/plc/automationbuilder>

The screenshot shows the ABB Automation Builder page. The header includes the ABB logo, navigation links (HOME, OFFERINGS, PLC AUTOMATION, AUTOMATION BUILDER), and a GLOBAL SITE dropdown. A cookie consent banner is present. The main content area is titled "Automation Builder" and describes the software suite. A list of features is provided, including coverage of AC500 PLCs, availability for download, and support for various editions. A red arrow points to the "Downloads" section, which contains links for "Download Automation Builder", "Download End User License Agreements", "Download User Documentation", and "Download Application Examples". The "Download Automation Builder" link is circled in red. To the right, there is a section for language selection (EN, DE, IT, ES, PL, SV, ZH, JA) and a search bar. Below this is a monitor displaying the Automation Builder interface. At the bottom right, there is a link to "Contact us" for support or purchase information.

### Automation Builder

ABB Automation Builder is the integrated software suite for machine builders and system integrators wanting to automate their machines and systems in a productive way. Combining the tools required for configuring, programming, debugging and maintaining automation projects, Automation Builder addresses the largest single cost element of most of today's industrial automation projects: time spent on working with software.

- ABB Automation Builder covers the engineering of AC500 PLCs, AC500 safety PLCs, CP600 control panels, drives and motion.
- Automation Builder is available for download from this website. A convenient setup helps to configure the installation. It also handles license registration, maintenance and updates of the software.
- Automation Builder is available in Basic (free), Standard and Premium editions fitting the needs of small projects and managing the challenges of many and large projects for OEMs and system integrators.
- Automation Builder is immediately available by using the incorporated 30-day test license.
- To learn more, please see Automation Builder Platform and Software pages.

#### Software options

## Step 2: Download Automation builder 2.2 (it is the version currently installed on the lab PCs).

The screenshot shows the ABB Automation Builder software download page. The header includes the ABB logo, navigation links (HOME, OFFERINGS, PLC AUTOMATION, AUTOMATION BUILDER, PLATFORM, SOFTWARE), and a GLOBAL SITE dropdown. A cookie consent banner is present. The main content area is titled "Automation Builder software download" and describes the software suite. A list of licenses is provided, including a free 30-day trial license, a free basic edition, and a purchased standard or premium license. A red arrow points to the "Previous Automation Builder versions:" section, which contains links for "Automation Builder 2.3 Download", "Automation Builder 2.2 Download", "Automation Builder 2.1 Download", and "Automation Builder 2.0 Download". The "Automation Builder 2.2 Download" link is circled in red. To the right, there is a section for language selection (EN, DE, IT, ES, PL, SV, ZH, JA) and a search bar. Below this is a monitor displaying the Automation Builder interface. At the bottom right, there is a link to "Contact us" for support or purchase information.

### Automation Builder software download

Automation Builder is available in Basic, Standard and Premium editions meeting the needs of small projects and managing the challenges of many and large projects for OEM and system integrators.

Start working immediately: After installation, on the first start-up of Automation Builder you can choose from different licenses:

- Free 30-day trial license – unlocking standard and premium features
- Free Basic edition
- Purchased standard or premium license
  - Licenses can be activated, removed and transferred anytime
  - Availability of network licenses for installation on a license server

Life-cycle support: When installing Automation Builder you can include former version profiles into your installation to maintain compatibility with projects done in former versions of Automation Builder. Alternatively you will find installation files for selected former versions in the ABB Library below.

Latest Automation Builder version (recommended): Automation Builder 2.4
